

HOW COULD I KNOW IF A MITSUBISHI ELECTRIC SYSTEM CAN BE CONTROLLED WITH ZENNIO GATEWAYS?

1. Identify the model of **indoor units** in the Mitsubishi Electric system.

2. You should extract the characters corresponding to the model of indoor unit. Below you can see some examples of indoor units and the characters that correspond to the model:

	Model	Outdoor unit	Indoor unit	Table model
Residential	MSZ-SF25VE2	MUZ-SF25VE	MSZ-SF25VE2	→ MSZ-SF
Mr. Slim	PLZS-35VBA	PUHZ-ZRP35VKA	PLA-RP35BA	→ PLA-RP
City Multi			PEFY-P40VMH-E	→ PEFY-P-VMH-E

3. **Find that model in the compatibility table below** and check if it is compatible with KLIC-MITT v3.

If a model of Mitsubishi Electric indoor unit is not in this list, please, consult with **Zennio Technical Support** <http://support.zennio.com>

Important: the compatibility indicated below is possible only with indoor units manufactured since 2014. For indoor units manufactured before 2014, please, contact Zennio technical support: <http://support.zennio.com/hc/en-us/requests/new>.

COMPATIBILITY OF MITSUBISHI ELECTRIC INDOOR UNITS WITH KLIC-MITT v3

¹ It requires one of the following adaptors:

- 9900019 (Zennio) for CN100 connection.
- PAC-IT51AD-E (Mitsubishi Electric) for CN51 and CN100 connections.
- PAC-IT52AD-E (Mitsubishi Electric) for CN52 and CN100 connections.

Please, contact Mitsubishi Electric for purchasing PAC-IT51AD-E and PAC-IT52AD-E adaptors.
